PROJECTS

BUS RESERVATION SYSTEM (12/2021)

- It is a web development projects based on the bus reservation system there is various language used in this project like html, css, javascript, mongodb. From this we have taken a lot experience .

Landing Page (12/2022)

- A simple landing page of an E-Commerce website using HTML&CSS.

Contact Tracing (12/2022)

- In this project ,we have experimented with a dataset to explore how machine learning algorithms can be used to analyze the data. This project has used DBSCAN Algorithm that group data points close to each other and marks outlier datapoints as noise.
